

Chengjie Jiang

School of Psychology, University of Nottingham | chengjie.j@outlook.com

<https://chengjiejiang.github.io> | www.linkedin.com/in/chengjie-j

- Keen interest in psycholinguistic research, particularly how comprehenders construct and update mental representations of what they read.
- Hands-on experience collecting and analysing both behavioural (e.g., self-paced reading, eye-tracking) and ERP data.
- Proficient in advanced statistical methods (linear mixed-effect modelling and Bayesian mixed-effect modelling) using R.

Education

PhD in Psychology, University of Nottingham, UK 2026 (expected)

Supervisors: Dr. Ruth Filik, Dr. Walter J. B. van Heuven

Thesis: Examining the role of world knowledge during language comprehension

MA in Foreign Linguistics and Applied Linguistics June, 2022

Nanjing Normal University, China

Supervisor: Dr. Xiaodong Xu

BA in English, Zhejiang University of Technology, China June, 2019

Supervisor: Dr. Luming Wang

Journal Articles

Jiang, C., van Heuven, W. J. B., & Filik, R. (under revision). Multiple worlds in one mind:

Exhaustive activation of world knowledge during language comprehension. [The manuscript has received the first round of reviews and is currently under revision]

Jiang, C., & Filik, R. (2026). Do redundancy-driven inferences arise spontaneously during comprehension?. *Discourse Processes*. <https://doi.org/10.1080/0163853X.2026.2714813>

Jiang, C., & Filik, R. (2025). Expecting the unexpected: Examining the interplay between real-world knowledge and contextual cues during language comprehension. *Memory & Cognition*, 53, 1888–1908. <https://doi.org/10.3758/s13421-025-01689-x>

Jiang, C., & Xu, X. (2021). The influence of pronouns' morphosyntactic features on referential resolution in Chinese topic structures: Converging evidence from multiple measures [代词的形态句法特征在汉语话题回指中的作用——基于多项指标的汇流证据]. *Modern Foreign Languages* [现代外语], 6, 742–753.

Conference Presentations

Oral Presentations

- 2025.** Jiang, C., van Heuven, W., & Filik, R. Is world knowledge activation exhaustive or selective during language comprehension? Evidence from bidirectional self-paced reading. 31st Architectures and Mechanisms for Language Processing (**AMLaP 31**). Charles University, Czechia.

Jiang, C., van Heuven, W., & Filik, R. Is world knowledge activation exhaustive or selective during language comprehension? Evidence from bidirectional self-paced reading. A joint meeting between the Experimental Psychology Society (**EPS**) and the Canadian Society for Brain, Behaviour and Cognitive Science (**BCSBBCS**). University of Dundee, UK.

Posters

- 2026.** Jiang, C., & Filik, R. Do redundancy-driven inferences arise automatically during comprehension?. Experimental Psychology Society (**EPS**) Meeting. Newcastle University, UK.

- 2025.** Jiang, C., van Heuven, W., & Filik, R. Is world knowledge activation exhaustive or selective during language comprehension? Evidence from bidirectional self-paced reading. 11th Experimental Pragmatics Conference (**XPRAG 11**). University of Cambridge, UK.

Jiang, C., van Heuven, W., & Filik, R. Is world knowledge activation exhaustive or selective during language comprehension? Evidence from bidirectional self-paced reading. 38th Annual Meeting of the Society for Human Sentence Processing (**HSP 38**). University of Maryland, USA.

- 2024.** Jiang, C., & Filik, R. Expecting the unexpected: Examining the interplay between world knowledge and context in relatively unconstraining scenarios. 3rd Experiments in Linguistic Meaning conference (**ELM 3**). University of Pennsylvania, USA.

Jiang, C., & Filik, R. Expecting the unexpected: Examining the interplay between world knowledge and context in relatively unconstraining scenarios. 37th Annual Meeting of the Society for Human Sentence Processing (**HSP 37**). University of Michigan, USA.

- 2023.** Jiang, C., & Filik, R. Hanging clothes in the refrigerator: Reversed bias in counterfactual semantic integration. 29th Architectures and Mechanisms for

Language Processing (**AMLaP 29**). BCBL, Spain.

Jiang, C., & Filik, R. Hanging clothes in the refrigerator: Reversed bias in counterfactual semantic integration. Experimental Psychology Society (**EPS**) Meeting. Swansea University, UK.

Research Experience

2024. The influence of healthy ageing on syntactic processing in reading

- Collected eye-tracking data from 18 participants

2022. Understanding counterfactuals in direct and indirect speech: An event-related potential investigation [supported by the National Social Science Fund of China]

- Designed the experiment, created and pre-tested the stimuli;
- Collected ERP data from 52 participants;
- Pre-processed ERP data using MATLAB;
- Analysed ERP data using linear mixed-effects models.

2021. Can counterfactual reasoning take place independently of truth? An investigation using event-related potentials [supported by the National Social Science Fund of China]

- Prepared the stimuli and collected ERP data from 32 participants;
- Pre-processed ERP data using MATLAB;
- Analysed ERP data using linear mixed-effects models.

Teaching Experience

School of Psychology, University of Nottingham

Practical Methods for Psychologists 1

Demonstrator & Coursework Marker
Autumn 2024

Practical Methods for Psychologists 2

Demonstrator & Coursework Marker
Spring 2025, Spring 2024

Grants and Awards

2025. Grindley Grant (£500)

The Experimental Psychology Society

Graduate Student Travel Support (\$375)

The 38th Annual Meeting of the Society for Human Sentence Processing Committee

2024. Conference fund (£750)

School of Psychology, University of Nottingham

2023. Conference, Travel, and Training Fund (£500)

Researcher Academy, University of Nottingham

2021. National Scholarship for Graduate Students (top 2%, ¥20, 000)

Ministry of Education, China

Skills

Experimental

Self-paced reading, eye-tracking, ERPs

Software and platforms

R, R Studio, MATLAB (eeglab, fieldtrip), Ibex, PsychoPy, OpenSesame, E-prime, BrainVision, Data Viewer, Qualtrics, Prolific

Data analysis

Linear mixed-effects modelling; Bayesian mixed-effects modelling

Languages

Native: Mandarin Chinese

Proficient: English
